

# Main Learning Objectives

1. **Emotional and Symbolic Expression:** Students will learn how to use colour, patterns, and symbols to express their feelings (e.g., warm colours for "happy") and tell stories from different cultures.
2. **Fine Motor and Technical Skill:** Students will develop their physical dexterity by using a variety of tools—such as sponges, rollers, cotton buds, and stamps—to create specific marks and textures.
3. **Global and Cultural Awareness:** Students will explore how people around the world (from Mexico to Australia to Morocco) create art, recognising that different ways of making things are all equally "beautiful."

# Main Learning Objectives

1. **Deconstructing Design:** Students will learn that a magazine is made of different "building blocks" (titles, pictures, and prices) and identify how they fit together.
2. **Purposeful Branding:** Students will choose colors and fonts that match a "feeling" (e.g., "scary" or "friendly") to attract a specific reader.
3. **Physical Construction & Iteration:** Students will practice moving elements around to find the best layout and learn how to assemble a functional physical product (the badge).
